SUMMARY

Junior Software Testing Engineer with concrete understanding of **STLC/SDLC** and proven experience in **Manual testing**, **integration** & **API testing** for legitimate **web** and **mobile** platforms via **Postman (REST API)**. Experienced in writing high-level test cases and bug tracking via **Jira, Trello, and Zephyr.** Prompted **AI** driven test cases to detect **edge cases**. Proven experience in E-commerce and telecom business domains and cross-functional team collaboration to ensure high quality product delivery.

EXPERIENCE

Manual Software Tester *01/2026 – 06/2026*
AIM Tech

- Applied integration**, design & usability,** and API testing across mobile & web platforms via **Postman.**
- Executed **800**+ high-level test cases and logged **200**+ bugs via Jira.
- Validated **session management**, **time-zones** handling, **rate limiting**, & **token** authentication across **100**+ **endpoints**.
- Evaluated project's **Acceptance criteria** through validating **50**+ user stories.

PROJECTS

Genie Mobile App *02/2026 – 06/2026*
Live Consumer-based Application by AIM Tech

- Applied integration testing across mobile **app**, web **dashboard**, & Backend API via **Postman (REST).**
- Validated **100+** API requests using **HTTP methods** such as (**PUT**, **POST**, **PATCH**, **GET**, and **DELETE**).
- Evaluated API **response time handling**, **headers**, and **response status codes** across **100+** endpoints.
- Tested advanced testing concepts such as **pagination**, **caching**, **server** and **local time**, **time-zones**, **sessions**, **access** and **refresh tokens**, and **SQL Injection**.
- Simulated **150+** test scenarios for each type of user; such as admin, guest and provider**.**
- Coordinated with teams and delivered a complete **bug report** on schedule using Jira.
- Ran **UAT** and **smoke** tests to validate end-to-end user flows.
- Reviewed and Verified **50+** user stories and **functional requirements** to further reduce **time** and **cost** later spent during the development lifecycle.

TOOLS

API: Postman (REST API)
Bug Reporting: Jira & Zephyr
Test tracking: Trello & Clickup
Test Management: Microsoft Excel & Google Sheets
Test Case Generation: Claude, Gemini & Chat GPT

TECHNICAL SKILLS

Manual Testing

- Practical experience in integration testing, web & mobile testing, design & usability testing, smoke & **exploratory** testing, **UAT**, **test data** preparation, **QA/QC** approaches, and **static** testing.

API Testing

- Effective in using **Postman** (**REST API**) to evaluate end to end user flows and validate HTTP methods, Response codes & headers, and parameters.

Agile Methodologies

- **Scrum** and **Kanban** workflows.

Generative AI

- Utilized LLM tools such as **Claude** to analyze **user stores** and **requirements**, and generate structured **test cases**, **test scenarios**, and **edge cases**.
- Generated comprehensive **completion reports** by summarizing results, highlighting risks, and suggesting **corrective actions**.

SOFT SKILLS

Analytical Thinking, Attention to Detail, Team Collaboration, & Problem Solving

CERTIFICATES

ISTQB Certified Tester (CTFL v4.0)
Certificate code: 260824061

Manual Software Testing Diploma - AIM Tech
June 2026

EDUCATION

Bachelor of Computer Science *08/2018 – 07/2022*
Future University in Egypt
Major: Information Systems
Graduation project: *FUE Got Talent* - Grade: **Excellent:**

- **Scope**: A competitive cross-platform app built to nominate highly rated contestants by reviewing, sorting, and filtering short reels.

LANGUAGES

English: English Score **CEFR** level: **C1** and **IELTS** band score: **8.0/9**

Arabic: Native Language
